To: DWR IRWM Grants@DWR <dwr_irwm@water.ca.gov>;

Hello,

I am with California State University representing one of the campuses (Sacramento) that submitted for the 2016 Water-Energy Grant for a request of total funding of \$1,272,654.22.

We are pleased to see the preliminary results and eagerly await the formal decision of grant awards. My email today is in response to Development of Draft Funding Recommendations and Monitoring Options for

2016 Water-Energy Grants memo.

http://www.water.ca.gov/waterenergygrant/docs/Monitoring%20of%202016%20Water%20Energy%20Grants_01302016_Final.pdf

At Sacramento State, currently we have secured some funding for a water metering project on campus to install water meters on buildings lacking. We are currently short funding to complete the entire water metering project. The water meters would aid in the monitoring of the Water-Energy Grant project as we proposed in our grant submission. Would this type of request qualify for a request of additional funding directly to grantees to carry out the necessary monitoring for the approximately \$1.28 million that could not be awarded directly to projects and is planned to be utilized to meet post project monitoring requirements of the Air Resources Board?

Please advise and if so, what further information is needed regarding our request for additional funding?

Thank you so much in advance,

Kristina Cullen, MBA
